

# PAREXUSA

*As one of the industry's leading manufacturers of specialty building materials, Parex USA is committed to providing environmentally responsible façade and finishing solutions.*

*Our commitment to innovation and sustainability inspires us to develop high performance products using new technologies that keep environmental and health performance values in mind – both inside and out of the building.*

*In cooperation with key industry initiatives for product transparency, the following information regarding Parex USA material is provided for consideration:*

■ *None of the following materials and chemicals (added and/or naturally-occurring) are found in Parex USA façade and finishing mortars, adhesives, membranes, primers, sealers, coatings and finishes.*

Living Building Challenge Red List

- Asbestos
- Cadmium
- Chlorinated Polyethylene & Chlorosulfonated Polyethylene
- Chlorofluorocarbons (CFCs)
- Chloroprene (Neoprene)
- Formaldehyde (added)
- Hydrochlorofluorocarbons (HCFCs)
- Lead (added)
- Mercury
- Petrochemical Fertilizers & Pesticides
- Phthalates
- Polyvinyl Chloride (PVC)
- Wood treatments containing Creosote, Arsenic, or Pentachlorophenol

US EPA Chemicals of Concern

- Benzidine Dyes
- Bisphenol A (BPA)
- Methylene Diphenyl Diisocyanate (MDI)
- Nonylphenol and Nonylphenol Ethoxylates
- Perfluorinated chemicals (PFCs, including PFOA)
- Short-chain chlorinated paraffins
- Toluene Diisocyanate (TDI)

■ *VOC content of Parex USA's façade and finishing mortars, adhesives, membranes, primers and sealers are low <10 g/L or no VOC materials. Coatings and finish base materials are low or no VOC as manufactured. Zero VOC pigments (< 1 g/L) are available for integral color in all Parex USA finishing materials when tinted with Parex USA NOVOC and ColorFast colorants.*

■ *Our materials meet SCQAMD Rules 113 & 1168, BAAQMD Regulation 8, and GreenSeal Standard 11.*

Parex USA is committed to the safety of our partners and to supporting the sustainable development initiatives of our clients. Contact us for support on your next sustainability project and find out how Parex USA materials contribute to an environmentally friendly built environment.
